In [1]:
```python
name=input("Enter name:")
if name=="sai":
    print("Hello sai...")
```
Simple if statement example

```
Enter name:sai
Hello sai...
```

In [2]:
```python
name=input("Enter name:")
if name=="sai":
    print("Hello sai...")
```

```
Enter name:govardhan
```

In [3]:
```python
name=input("Enter name")
if name=="xyz":
    print("Hello xyz...")
print("How r u?")
```

```
Enter nameabc
How r u?
```

In [4]:
```python
name=input("Enter name:")
if name=="ravi":
    print("Hello ravi...")
else:
    print("Hello guest...")
```
If-else statement example

```
Enter name:ravi
Hello ravi...
```

In [5]:
```python
name=input("Enter name:")
if name=="ravi":
    print("Hello ravi...")
else:
    print("Hello guest...")
```

```
Enter name:sai
Hello guest...
```

In [6]:
```python
brand=input("enter your favourite brand")
if brand=="RC":
    print("it is childrens brand")
elif brand=="KF":
    print("it is not that much kick")
elif brand=="FO":
    print("buy one get free one")
else:
    print("other brands are not recommended")
```
If-elif-else statement example

```
enter your favourite brandRC
it is childrens brand
```

In [7]:
```python
brand=input("enter your favourite brand")
if brand=="RC":
    print("it is childrens brand")
elif brand=="KF":
    print("it is not that much kick")
elif brand=="FO":
    print("buy one get free one")
else:
    print("other brands are not recommended")
```

enter your favourite brandKF
it is not that much kick

In [8]:
```python
brand=input("enter your favourite brand")
if brand=="RC":
    print("it is childrens brand")
elif brand=="KF":
    print("it is not that much kick")
elif brand=="FO":
    print("buy one get free one")
else:
    print("other brands are not recommended")
```

enter your favourite brandRG
other brands are not recommended
